

IMPORTANT SAFETY

INSTRUCTIONS

When using electric appliances, especially when children are present, basic safety precautions should always be taken, including the following:

READ ALL INSTRUCTIONS BEFORE USING

KEEP AWAY FROM WATER

DANGER

Any appliance is electrically live even when the switch is off. To reduce the risk of death or injury by electric shock:

1. **Always unplug it immediately after using.** 2. Do not use while bathing or in the shower. 3. Do not place or store appliance where it can fall or be pulled into a tub or sink. 4. Do not place in, or drop into water or other liquids.

5. If an appliance falls into water, unplug it immediately. **Do not reach into the water.**

WARNING

To reduce the risk of burns, electrocution, fire, or injury to persons:

1. **This appliance should never be left unattended when plugged in.**

2. **Do not pull, twist, or wrap line cord around appliance.**

3. This appliance should not be used by, on or near children or individuals with certain disabilities. 17. This appliance is not a toy. Keep away from children.

16. Do not use with a voltage converter.

15. Do not attempt to touch the housing of your appliance near the barrel, as it is hot when in use.

14. Do not attempt to touch the housing of your Use handles or knobs.

13. Do not use an extension cord with this appliance.

12. Never block the air openings of the appliance or place it on a soft surface, such as a bed or couch, where the air openings may be blocked.

11. Never block the air openings of the appliance surface while it is hot or plugged in.

1. **Do not place the heated unit directly on any surface while it is hot or plugged in.**

10. Unit is hot when in use. Do not let heated surface touch eyes or bare skin.

9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.

8. Never drop or insert any object into any opening or hose.

7. Never use while sleeping.

6. Keep the cord away from heated surfaces, and repair.

5. **Never operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been dropped or damaged, or dropped into water. Return the appliance to an authorized service center for examination and repair.**

4. Use this appliance only for its intended use, as described in this manual. Do not use attachments not recommended by the manufacturer.

3. Use on Alternating Current (60 hertz only). This unit is designed to be operated at 120V AC.

2. This curling iron is intended for household use.

1. Never use while sleeping.

0. Keep the cord away from heated surfaces, and repair.

9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.

8. Never drop or insert any object into any opening or hose.

7. Never use while sleeping.

6. Keep the cord away from heated surfaces, and repair.

5. **Never operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been dropped or damaged, or dropped into water. Return the appliance to an authorized service center for examination and repair.**

4. Use this appliance only for its intended use, as described in this manual. Do not use attachments not recommended by the manufacturer.

3. Use on Alternating Current (60 hertz only). This unit is designed to be operated at 120V AC.

2. This curling iron is intended for household use.

1. Never use while sleeping.

SAVE THESE INSTRUCTIONS

OPERATING INSTRUCTIONS

GETTING STARTED

Plug the iron into an electrical outlet. Turn on the unit. Allow unit to heat up for 15 seconds.

The temperature setting will automatically lock within 5 seconds of turning your appliance on.

You may adjust the temperature immediately after turning the appliance on OR, if the temperature setting is locked, hold down the ON/OFF button for 1–2 seconds to adjust it.

Press and hold the ON/OFF button for 1–2 seconds to turn off unit (light will go off). Never leave your curling iron on and unattended.

However, should you fail to turn the unit off, it will shut itself off automatically within 60 minutes.

WARNING: The curling iron's titanium barrel will get very hot within a few seconds and should not be placed in contact with the skin after the curling iron has been turned on.

ADVANCED IONIC TECHNOLOGY

This styling iron features a ceramic heater that maintains constant temperature during use for precision styling.

The instant Heat technology has 11 ultra-high heat temperature settings. There is a temperature range that's gentle and safe for every type of hair, from the finest to the most resistant, and helps you create the look you want. And that's not all. Conair's professional salon standards of engineering provide you with a uniform and improved heat recovery become flyaway and difficult to style.

The powerful ion generator produces a stream of negative ions that act to neutralize the static charge, smoothing the scales on the cuticle for shiny, smooth and manageable hair, so you can achieve your desired style easily.

Consequently, hair may have a dull appearance. Also, high levels of static charge cause hair to become flyaway and difficult to style.

Consequently, hair may have a dull appearance. Also, high levels of static charge cause hair to become flyaway and difficult to style.

NOTE: The unit may produce a clicking sound at times, which is normal for a high-output ion generator.

STYLING WITH THE NEW TITANIUM EASY-GLIDE BARREL

The barrel of this premium curling iron is coated with titanium, which evenly distributes heat to gently style and protect hair from damaging hot spots.

It evenly distributes heat so that the style you create has a salon-perfect, silky smooth, shining finish. Hair also slips right through the barrel after it's curled.

The titanium technology is a pleasure to work with and makes styling your hair easier and the results more professional.

USING INSTANT HEAT, THE 11 ULTRA-HIGH HEAT TEMPERATURE SETTINGS & UNIFORM HEAT RECOVERY SYSTEM

after the curling iron has been turned on.

NOTE: Do not use this styling appliance on hair extensions.

10. Unit is hot when in use. Do not let heated surface touch eyes or bare skin.

9. Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.

8. Never drop or insert any object into any opening or hose.

7. Never use while sleeping.

6. Keep the cord away from heated surfaces, and repair.

5. **Never operate this appliance if it has a damaged cord or plug, if it is not working properly or if it has been dropped or damaged, or dropped into water. Return the appliance to an authorized service center for examination and repair.**

4. Use this appliance only for its intended use, as described in this manual. Do not use attachments not recommended by the manufacturer.

3. Use on Alternating Current (60 hertz only). This unit is designed to be operated at 120V AC.

2. This curling iron is intended for household use.

1. Never use while sleeping.

Temperature Setting Guide

to your particular need.

You can vary the iron's temperature according to your particular need.

1. Start curling with a hair section that is 1 inch wide and no more than ½ inch thick.

2. Open the spoon and place a hair section on the barrel, rolling it up close to the scalp.

3. At the end of hair section, release the pressure on the handle and allow the hair section to slide out.

4. Repeat process on additional sections of hair until you achieve the hairstyle you desire. It may be necessary to repeat process on certain areas, depending on the texture of your hair.

FUNCIONAMIENTO BÁSICO

Enchufe el cable en una toma de corriente.

Encienda el aparato. Permita que la unidad se caliente por 15 segundos.

El ajuste de temperatura se bloqueará automáticamente 5 segundos después de encender su aparato. Puede ajustar la temperatura al nivel deseado inmediatamente después de encender el aparato o, si el ajuste está bloqueado, manteniendo el botón + o - oprimido por 1 a 2 segundos.

Presione y mantenga oprimido el botón ON/ OFF por 1 a 2 segundos para apagar el aparato; el indicador luminoso se apagará. Nunca descuide/ deje el aparato sin vigilancia después de encenderlo. Para su seguridad, el aparato se apagará automáticamente después de 60 minutos.

ADVERTENCIA: el tubo se pone muy caliente en segundos; evite el contacto con la piel después de encender el aparato.

TECNOLOGÍA IÓNICA AVANZADA

Muchos factores ambientales modernos, incluso el aire acondicionado, las fibras artificiales y la contaminación, electrizan el cabello. Inclusive cepillar el cabello o secarlo con toalla puede crear estática, haciendo que la cutícula se ponga áspera

y que el cabello pierda su brillo. Altos niveles de estática también producen frizz y dificultan el peinado.

El potente generador de iones del cepillo produce iones negativos que neutralizan la carga positiva de la estática, suavizando la cutícula y dejando el cabello sedoso y dócil, para facilitar el peinado.
