## OPERATING INSTRUCTIONS

### How to Operate Your Hairsetter

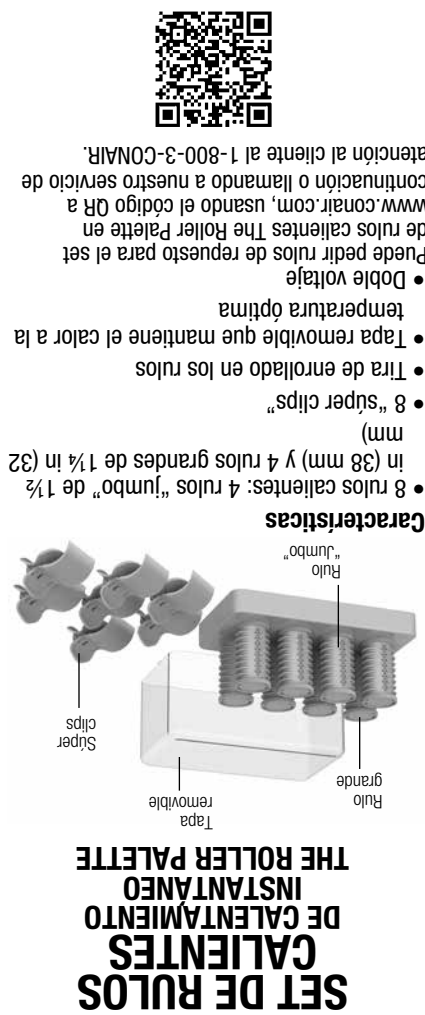

1. Place setter on a firm, flat surface. With the cover closed, plug cord into outlet. This appliance has a polarized plug (one blade is wider than the other). As a safety feature, this plug will fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.
2. Once plugged in, the rollers will heat up in minutes. The fastest, most efficient heat-up is provided when the cover is closed. Once the rollers are hot, you can begin styling your hair (please refer to **How to Curl and Style Your Hair** for further instruction).
3. When using the setter, your hair should be clean and dry (or slightly damp), never wet.

## SAVE THESE INSTRUCTIONS

1. Divida el cabello en secciones de 2 in (5 cm) para conseguir los mejores rizos. Coloque las puntas en los dientes de la tira de enrollado, y enrolle el rulo hacia el cuero cabelludo. Enrolle firmemente el cabello, y luego sujete el rulo con un clip puesto alrededor del mismo.
2. La textura de los rizos dependerá del diámetro de los rulos, de su temperatura y del tiempo que permanezcan en el cabello. Para conseguir rizos más duraderos, permita que los rulos se calienten por más tiempo y déjelos en el cabello por más tiempo.
3. Para quitar los rulos, sostenga el rulo con una mano y retire el clip con la otra. Deslice suavemente el rulo (NO LO JALE) y permita que el cabello rebote libremente. Permita enfriar por un minuto antes de peinarlo para “fijar” los rizos.
